How to Use CoPilot Create

A step-by-step helpsheet

CoPilot Create helps you turn your ideas into engaging worksheets and helpsheets—perfect for any learner, any subject!

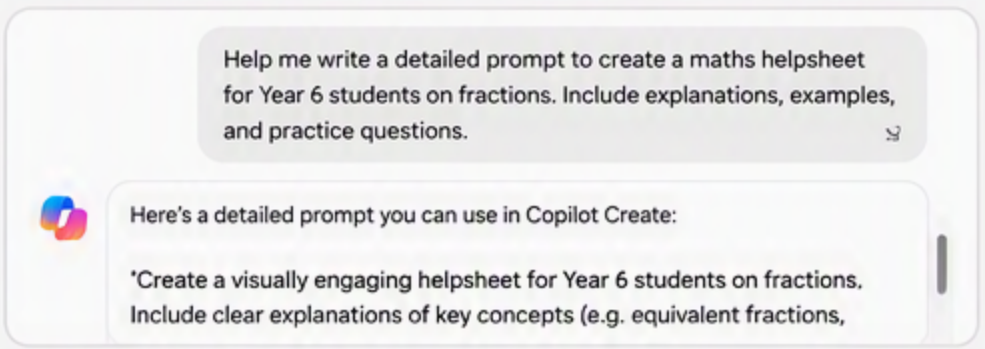

1 Open Microsoft Copilot

- Open Microsoft Copilot in your browser or app.

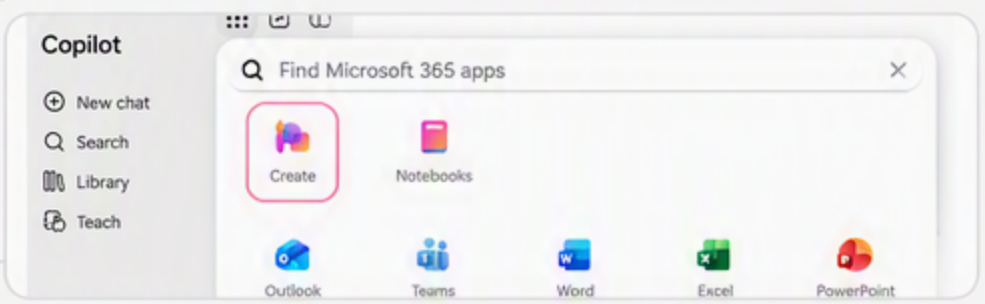

2 Create Your Prompt

- First, use Copilot to help you create the perfect prompt.
- Include all the information you need and be specific about the task and the type of learner you have.
- (Use the AI Prompting sheet to help.)

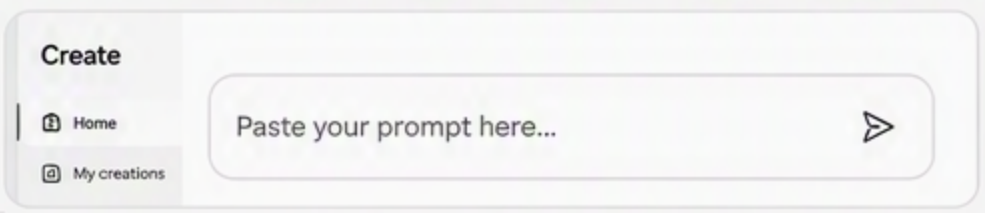

3 Go to CoPilot Create

- On Microsoft Copilot, click the 9 dots (app launcher) in the top left corner and select Create.

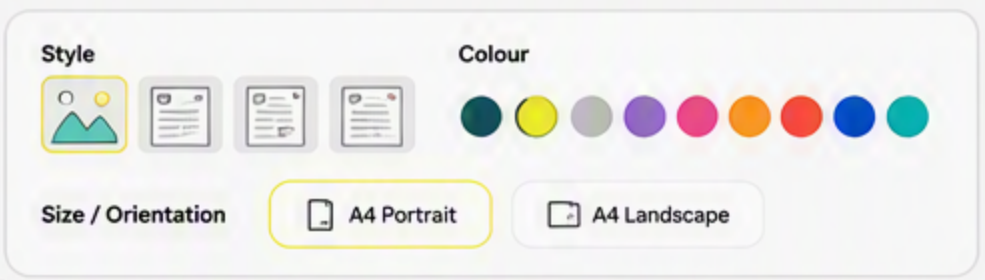

4 Copy Your Prompt

- Copy the prompt you created and paste it into CoPilot Create.

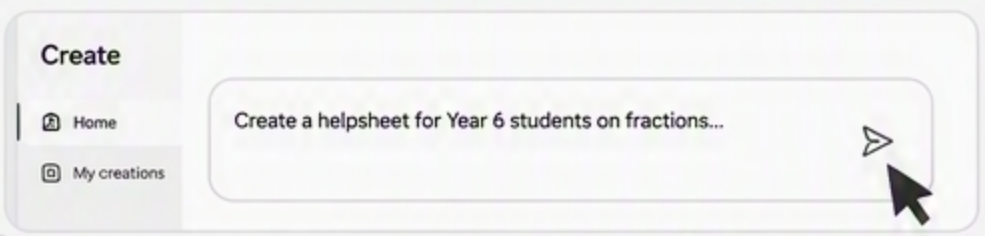

5 Choose Your Design

- Choose your style, colour scheme, and size/orientation to suit your needs.

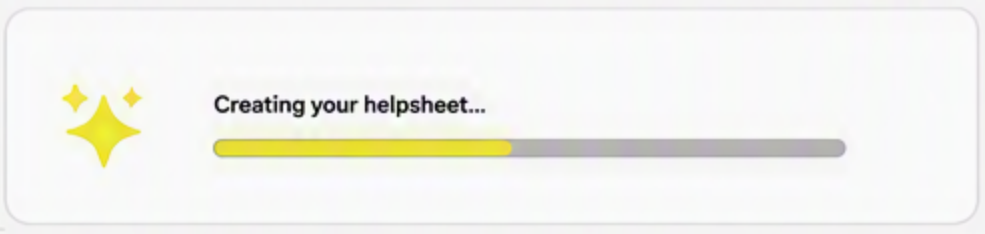

6 Click Enter

- Click Enter (or the send icon) to begin creating your worksheet or helpsheet.

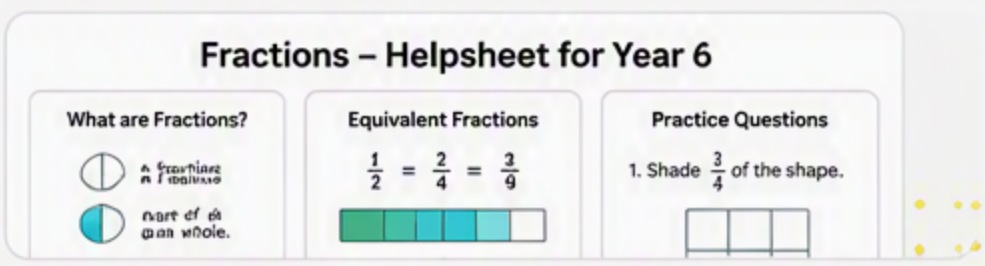

7 Let it Load

- CoPilot Create will now generate your content. Please wait while your helpsheet is being made.

8 Your Helpsheet is Ready!

- Your worksheet or helpsheet will appear on screen. You can download, print, or create more!

TOP TIP: CoPilot can only produce 1 side of A4 at a time.
If your task includes multiple activities, repeat the steps above for each page or section.
