Empowering Tutors
to Support Every Learner

Welcome to
Learning Accelerators

Microsoft Teams Learning Accelerators are a suite of powerful, AI-driven tools built directly into Microsoft Teams for Education. Designed to support tutors and educators, they provide structured opportunities for students to practise core skills, receive intelligent feedback, and build confidence in Mathematics, Reading, and Speaking. This booklet is your complete guide to setting up, running, and reviewing Learning Accelerator assignments across your classes.

What Are Learning Accelerators?

Learning Accelerators are accessed via Assignments > Create > Learning Accelerators in any class team. They work seamlessly within the Teams environment, meaning students engage with tasks in the same space they already use for class. Tutors can monitor progress, review recordings, and provide personalised feedback — all without leaving Teams.

How to Use This Training Booklet

This booklet is organised into six sections:

(1) Welcome and Overview of Learning Accelerators;
(2) Math Progress — generating practice problems, differentiating for understanding, and tracking data;
(3) Reading Progress — fluency passages, AI analysis, and student recordings;
(4) Speaker Progress — presentation practice, delivery coaching, and confidence building;
(5) Tutor Review and Feedback Workflows — reviewing student data and returning work;
(6) Quick-Reference Checklists and Troubleshooting Tips.

Each section includes step-by-step instructions, screenshots, callout boxes for important notes, and links to video resources.

What is Math Progress?

Math Progress helps educators generate practice problems, differentiate for understanding, track student progress and focus areas, and build data-informed lessons. It is a Microsoft Teams Learning Accelerator that integrates directly into the Assignments workflow, enabling tutors to create targeted maths activities — either AI-generated or custom-built — and monitor individual student performance with detailed insights.

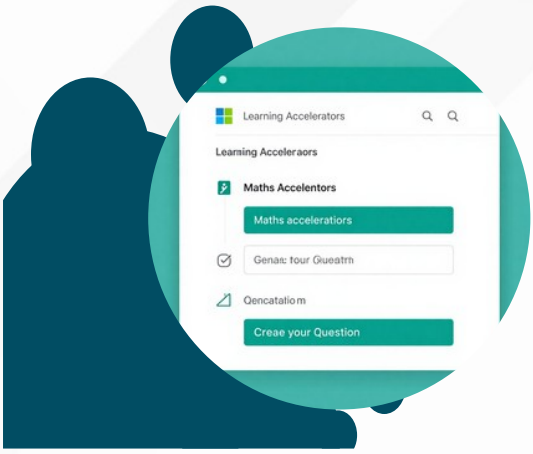

Core Capabilities

Generate practice problems instantly using AI across key topics including Numbers & Operations, Fractions, Expressions & Equations, and Algebra. Create your own custom questions (multiple-choice or short-answer) and mix them with generated questions. Assign to groups or individual students, set hand-in dates, and optionally include a Reflect check-in. Review detailed student data to identify focus areas and inform your next lesson.

Math

Progress Cont

To set up a Math Progress assignment:

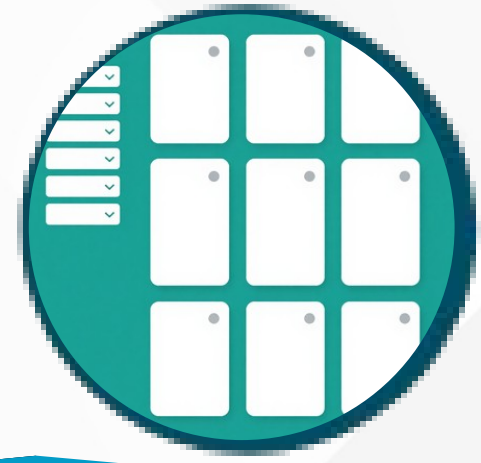

- Open your class team in Microsoft Teams
- Navigate to Assignments
- Click Create > Learning Accelerators > Maths accelerators.
- You will then choose how to create your question set: use Generate to have AI produce questions, or select Create your own to build questions manually. Both methods can be combined in a single assignment.

Option A: Generate Questions

Select a category: Numbers and operations, Fractions, Expressions & equations, or Algebra. Choose a linked topic from the list provided, then click Generate. Review the questions produced by AI. To keep a question, click the dot at the top right of each question card. When you have selected all desired questions, click Next to proceed. NOTE: You can mix generated and custom questions in the same assignment.

Option B: Create Your Own Questions

Click Add questions to begin. Choose a category: Numbers and operations, Fractions, Expressions & Equations, Algebra, Calculus, Functions, Statistics & probability, or Geometry. Create multiple-choice or short-answer questions, then click Save and Add to continue adding more. IMPORTANT: Do not click Next until all questions have been added to the question bank. Use the information icon (i) for guidance on any option, then click Done at the top right when finished.

Progress Cont

Assignment, Student & Tutor Workflows

Once questions are finalised, configure the assignment parameters before distributing to students. Complete all steps below carefully. Do not click Assign until all settings are confirmed.

Step	Action / Setting	Details	Notes
1	Add a Title & Instructions	Enter a clear assignment name and any instructions for students	Required
2	Set Hand-in Date	Set the due date so students know the deadline	Required
3	Select Group or Individual Students	Assign to whole class or specific students	Required
4	Optional: Add Reflect	Enables collection of student feelings data	Optional
5	Click Assign	Bottom right — publishes the assignment to students	Final Step
6	Use Info Icon for Help	Click Done at top right when all settings are complete	Optional

IMPORTANT: Do not click Assign until all questions have been added to the question bank. Once assigned, students will receive the task immediately if no scheduled date is set.

STUDENT WORKFLOW:

1. Open the assignment in Microsoft Teams or via the tutor-provided link.
2. Read each question carefully and enter your answer.
3. When all questions are complete, click Turn it in / Hand it in at the top right of the screen.

TUTOR REVIEW WORKFLOW:

1. Open Assignments or the relevant Classwork area in your class team.
2. Select the Math Progress assignment from the list.
3. Select an individual student to view their submission.
4. Review the presented data, including correct/incorrect responses, focus areas, and progress indicators.

NOTE: Data is available immediately after a student submits. Use insights to inform differentiated follow-up tasks
and data-driven lesson planning.

Reading Progress

Overview, Setup & Tutor Workflow

Build reading fluency with AI-powered audio and video recordings.
Assign passages from Word, PDF, or AI-generated content.
Review accuracy, expression, and pacing data per student.
Return personalised feedback with full, customised, or simplified reports.

Reading
Progress Cont

Setting Up a Reading Progress Assignment

- In your class team, click Assignments
- Create assignment > Learning Accelerator > Reading Progress.
- Choose one of three passage options: 1=.upload your own Word or PDF passage, 2.= create an AI-generated version. 3= or browse previously saved content.
- Once the passage is added, configure the parameters: set Require video to No to allow audio-only submission.

NOTE: If a Word or PDF passage was uploaded, click Edit to modify it within Reading Progress. Use Student View to trial the student experience before assigning. Tutors can access Student View at any time via the three dots (top right). Click Next at the top right when ready.

Configuring Assignment Settings

Name the assignment and add clear, supportive instructions (AI suggestions are available to help). Set the due date and any other relevant parameters.
Optionally add a Reflect check-in to capture student wellbeing data.
Click Assign to publish.

NOTE: Tutors can use the three dots in the top right at any point to open Student View and preview the full student experience.

Set Require Video: No

AI-Generated Passage

Reading
Progress Cont

Student Instructions

Students open the assigned Reading Progress task in Microsoft Teams. Click the three dots (...) to the right of the assignment and select Open in Teams. Then click Start to begin the reading session and the passage will appear on screen ready to read aloud.

Step 1 – Open & Start the Assignment

Read the displayed passage aloud clearly and at a steady pace. The AI will record and analyse your reading in real time. When you reach the end of the passage, click I am done to stop the recording. NOTE: If you need reading support, activate Immersive Reader by clicking the icon at the top right before or during reading — it can adjust text size, spacing, and background colour to suit your needs.

Step 2 – Read Aloud & Submit

IMPORTANT: Do not close the Teams window during reading as this may interrupt the recording. Once you click I am done, your submission is sent automatically to your tutor for review. Your tutor will be able to see your accuracy data, an expression view of your reading, and access the full audio recording. They may return written or video feedback via the assignment.

Reading Progress Cont.

Tutor Review & Feedback

Once students have submitted their reading recordings, tutors can access detailed performance data, listen to recordings, leave targeted feedback, and return work with a full, customised, or simplified report. Follow the steps below to complete the review cycle.

Step	Action	Location	Notes
1	Open the assignment	Assignments or Classwork	Click the assignment title
2	Select a student	Student list panel	Click any student name
3	Review Accuracy or Expression view	Top tab bar	Switch views as needed
4	Access the recording	Left panel / right panel	Click Student work to reveal
5	Leave feedback	Feedback box, left	Use paperclip for files/video
6	Return work with report	Right panel, Return button	Choose report type first

IMPORTANT: Before clicking Return, select the appropriate report type from the right panel:

- Full Report shares all AI data and accuracy metrics;
- Customised Report lets you choose which sections to include;
- Simplified Report shows a summary suitable for younger learners.

NOTE: Once you click Return, the student receives your written feedback and the selected report. Use the paperclip icon beneath the feedback box to record video feedback, attach supporting documents, or create a new document directly within Teams.

NOTE: The Accuracy view highlights mispronounced, skipped, or repeated words. The Expression view shows pace, pitch, and fluency patterns. Both views display the full passage with color-coded word-level data. The recording playback is accessible from the left panel; click Student work on the right to reveal the submission if it is not immediately visible.

Speaker Progress

Speaker Progress is a Microsoft Teams Learning Accelerator designed to build students' confidence, captivating delivery, and speaking competence. It provides AI-powered feedback that helps students identify and address common speaking challenges — including mispronunciation, speaking too fast or too slowly, overuse of filler words, and limited eye contact — in a supportive, low-pressure environment.

What is Speaker Progress?

Speaker Progress helps students develop effective use of voice, tone, and body language. It offers a wide range of topics and genres so students can practise in contexts relevant to them. Tutors can monitor progress over time, celebrate achievements, and use data-driven insights to guide targeted coaching and feedback.

SPEAKER PROGRESS VIDEO TUTORIAL - CLICK HERE

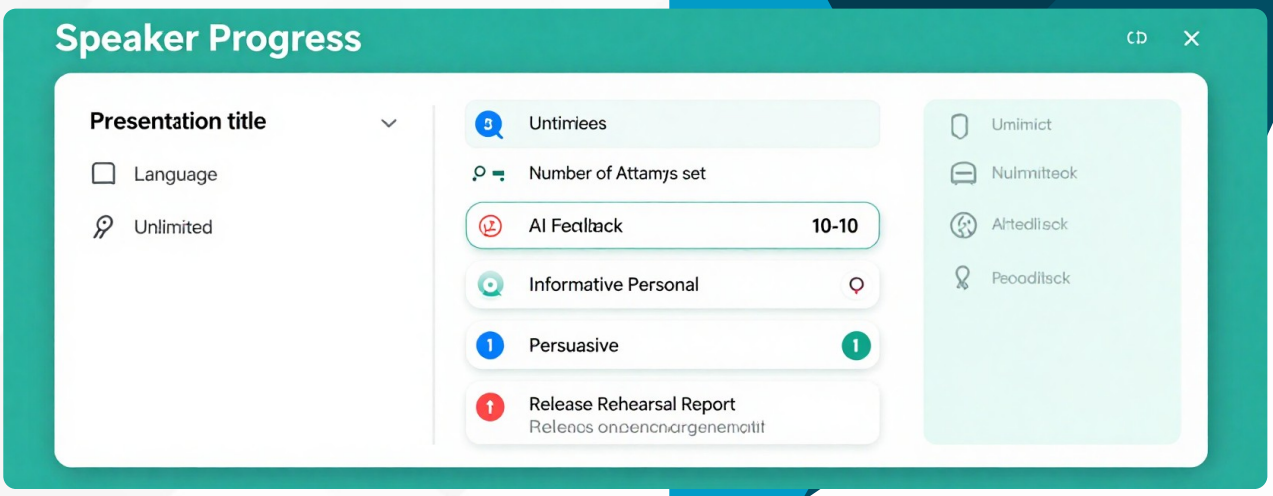

Key Benefits for Students and Educators

Speaker Progress analyses three core dimensions of student presentations: delivery (pace, pronunciation, filler words, eye contact), content (structure and clarity), and audience engagement (tone and body language). AI Feedback modes — Informative, Personal, and Persuasive — allow tutors to tailor the experience to the type of presentation students are preparing. Multi-language support includes Korean, Danish, Swedish, Spanish, Portuguese, and Norwegian, making it accessible to diverse learners.

NOTE: Students can attempt presentations multiple times (Unlimited attempts by default) with a maximum recording time of 10 minutes per attempt. Tutors can release a rehearsal report to students so they can review AI feedback before final submission. A Student View option is available at any point during setup so tutors can experience the assignment exactly as students do.

Speaker

Progress Cont - Se

Creating a Speaker Progress Assignment

- In your class team, click Assignments > Create assignment > Learning Accelerator > Speaker Progress.
- On the right-side panel, configure the following controls: Presentation Title (name the task); Language (multi-language support includes Korean, Danish, Swedish, Spanish, Portuguese, and Norwegian); Number of Attempts (Unlimited by default); Time Limit (maximum 10 minutes).
- Under AI Feedback, select a prompt type: Informative, Personal, or Persuasive. Toggle Release Rehearsal Report and enable Speaker Coach to analyse delivery, content, and audience engagement. Click Next at the top right when configuration is complete.

Finalising Assignment Settings

NOTE: Tutors can click the three dots at the top right at any time to open Student View and trial the student experience before assigning.

- After clicking Next, name the assignment and add clear, supportive instructions. Set hand-in dates and any other required parameters.
- Optionally click Reflect to collect student wellbeing data.
- Add or upload assessment criteria to guide student performance.
- Click Assign to publish.

IMPORTANT: Ensure AI Feedback type matches the task purpose — use Persuasive for debate/opinion tasks, Informative for factual presentations, and Personal for reflective or narrative speaking tasks.

Assignments > Create | Learning Accelerator | Configure & Assign | Speaker Progress

Speaker
Progress Cont

Students access their Speaker Progress assignment directly in Microsoft Teams. Open the assignment, click the three dots (...) to the right of the assignment title, and select Open in Teams. Click Start to begin recording your presentation. Speak clearly while the AI analyses your delivery in real time.

Step 1 – Start & Record Your Presentation

- Once recording begins, present your topic aloud.
- When finished, click the red Stop button to end the recording.
- You may optionally upload a PowerPoint presentation to accompany your recording.
- After stopping, click View my report or View report to review the AI-generated feedback covering delivery, content, and audience engagement.
- If you are satisfied with your recording, click Use the recording to confirm your submission.

Step 2 – Review Report & Submit

- After reviewing your AI report, click Turn it in at the top right of the screen to submit your assignment to your tutor.
- Your tutor will then be able to view your recorded video, your AI-generated Speaker Coach report, and any progress data.

NOTE: You may attempt the recording multiple times if your tutor has set Unlimited attempts. Always review your report before submitting to ensure you are happy with your performance.

Speaker Progress Cont

Tutor Review & Feedback

After students submit their Speaker Progress assignments, tutors can access rich AI-generated data and insights for each recording. Use the steps and guidance below to review student work, analyse delivery metrics, and provide meaningful feedback.

Step	Action	Location	Notes
1	Open the assignment	Assignments panel	Classwork area
2	Select a student	Student list view	Click student name
3	Review data and insights	Results dashboard	Criteria-based
4	Watch the recorded video	Top-right video player	Full recording shown
5	Leave written feedback	Bottom-left feedback box	Type directly in box
6	Attach files or record feedback	Plus sign under feedback	Upload or record live

The results dashboard provides extensive AI-generated insights aligned to the assessment criteria you selected during setup. Data is organised across three areas:

- Delivery (pace, pitch, filler words, pronunciation errors),
- Content (structure, vocabulary, relevance),
- Audience Engagement (eye contact, gestures, confidence).

Review each section carefully to build a complete picture of student performance before writing your feedback.
IMPORTANT: Insights are only as detailed as the criteria selected at setup. If key criteria were not enabled, some data panels may be empty. For future assignments, return to Speaker Progress setup and enable all relevant Speaker Coach options.

Providing Feedback to Students

13 NOTE: Use the plus sign below the feedback text box to upload supporting documents, annotated rubrics, or to record a short video message directly within Teams. Video feedback is especially effective for demonstrating correct pronunciation or modelling confident delivery.

Quick-Reference

Checklists

Tutor Setup Checklist — All Learning Accelerators

Teams > Assignments > Create > Learning Accelerators > select tool.
Add a clear title and full instructions for students.
Set correct hand-in/due dates before clicking Assign.
Select the correct group or individual students.
Optionally add Reflect for student wellbeing data.
Use the three-dot menu (top right) to open Student View and trial the experience before assigning.
Verify passage or question content is complete before clicking Next.

Troubleshooting

& Tips

Speaker: Max recording time is 10 minutes. AI Feedback options: Informative, Personal, or Persuasive. Multi-language support includes Korean, Danish, Swedish, Spanish, Portuguese, and Norwegian. Student clicks red button to stop recording, then reviews AI report before clicking Use the recording and Turn it in.

NOTE
Math: Do not click Next until ALL questions are added to the bank.

NOTE

Reading: If passage needs editing, click Edit within Reading Progress.

NOTE
Reading: Set Require Video to No for audio-only student submissions.
